

BY THE NUMBERS

List the number of Syrian refugees in each country shown on the map, rounded to the nearest thousand. Then calculate the total number of refugees.

Country	Number of Refugees (rounded)
1.	
2.	
3.	
4.	
5.

A Workout for Your (Common) Core

- What is the average number of Syrian refugees in each of these five countries (based on the rounded figures)? Excluding Iraq, what is the average number in the remaining four countries?
- Suppose Iraq wants to help Turkey by taking in some of its Syrian refugees. How many of these refugees would Iraq have to accept so that the average number of refugees in the other four countries decreases to 525,000?
